

Contents

Preface	i
Be Careful—And Have Fun	xiii
Minimum Safety Guidelines for Chemical Demonstrations	xv
<hr/>	
Doing Chemistry in the Middle School Classroom	1
Science and Chemistry—The ICE Approach	1
Common Chemicals and Supplies In and Around Your Home	2
Measurement Equivalents for Science Activities	3
Mass-Volume Equivalents of Common Solids	4
Temperature	4
<hr/>	
	2
The Scientific Method	7
Science and Technology	7
The Scientific Method	8
Activities Using the Scientific Method	10
Designing an Experiment	13
Risks and Benefits	15

3

It Really Does Matter!	17	
States of Matter		18
Relationships Among States of Matter		20
Forms of Matter		21
What Are Pure Substances?		22
Separation of Mixtures		24
Physical and Chemical Changes and Properties		27
Solutions and Concentrations		30
Weight Percent		32
Volume Percent		32
Parts Per Million		33
Chemical Language		33

4

Atoms and the Periodic Table		39
The Structure of Atoms		39
Isotopes		41
Atomic Mass		43
Valence Electrons		43
The Periodic Table		43
Groups and Periods		45
Metals and Nonmetals		47
A Survey of Some Commonly Encountered Elements		48

5

The Glue Holding Atoms Together: Chemical Bonds		61
The Octet Rule		62
Ionic Bonds		63
Polyatomic Ions		64
Characteristic Properties of Ionic Compounds		65
Covalent Bonds		67
Single Covalent Bonds		68
Double and Triple Covalent Bonds		69
Shapes of Covalent Molecules		70
Hydrocarbons		70
Polymers		71
Summary		73

The Energy Story	75
Forms of Energy	76
Energy Transformations	77
Law of Conservation of Energy	78
Chemical Energy	80
Energy from Light and Other Forms of Electromagnetic Radiation	81
Nonrenewable Energy Sources	84
Petroleum	85
Coal	87
Natural Gas	87
Renewable Energy Sources	88
Solar Energy	88
Biomass	89
Water Power	90
Wind	90
Geothermal Reserves	90
Oceans	90
Nuclear Fission as an Energy Source	90
Energy from Food	92
Carbohydrates	93
Fats	93
Proteins	93
An Energy Summary	94

What is a Chemical Reaction?	95
Recognizing Chemical Changes	95
Writing Chemical Equations	98
The Speeds (or Rates) of Chemical Reactions	101
Concentration	101
Surface Area	102
Temperature	102
Catalysts	103
Reaction Types	103
Combination Reactions	103
Decomposition Reactions	104
Displacement Reactions	105
Exchange Reactions	107

Chemical Opposites: Acids and Bases	109
What Are Acids and Bases?	110
Is a Solution Acidic or Basic?	111
Strength of Acids and Bases	114
Neutralization Reactions	115

The Chemistry of our Environment	117
The Crust—The Solid State	117
Silicate Minerals and Their Uses	118
Metals and Their Minerals	120
The Hydrosphere—The Liquid State	121
Properties of Water	122
The Water Cycle	126
The Atmosphere—The Gaseous State	128
Properties of Gases	129
The Relationships Among Volume, Pressure, and Temperature of Gases	130
Temperature and Volume	131
Volume and Pressure	131
Pressure and Temperature	131
What Is Clean Air?	132
What Is Polluted Air?	133
Carbon Monoxide	134
Nitrogen Oxides	135
Sulfur Dioxide	135
Hydrocarbons	136
Ozone	136
Particulates	137
Radon	137
Carbon Dioxide	138

Appendices	139
Appendix A: National Science Education Standards	139
Appendix B: Recommended Resources	142
Appendix C: Common Chemicals In and Around the Home	146
Appendix D: The Chemical Locator— A Cross Reference of Chemicals by Common Name	154
Appendix E: Equivalent of Common Kitchen Measures	159
Appendix F: Mass Equivalent of Common Solids	160
Appendix G: Answers to “What do you think?”	164
Appendix H: Answers to Puzzles	168
